EDUCATION

2023-2027
HIGHER EDUCATION

- Anna University
- B.Tech in Artificial Intelligence and Data Science
- CGPA: 8.44 (current)

SKILLS

- Programming: **Python, SQL, C**
- Machine Learning: **Classification, Regression, Clustering, Model Training & Evaluation**
- Data Analytics: **Pandas, NumPy, Matplotlib, Seaborn, EDA**
- Tools & Platforms: **Scikit-learn, Jupyter Notebook, Git, GitHub, VS Code**
- Databases: **MySQL**
- Core Skills: **Statistics, Feature Engineering, Data Preprocessing**

LANGUAGES

- English: Fluent
- Tamil: Native

SUMMARY

Aspiring Machine Learning Engineer and B.Tech AI & DS student with knowledge of Python, Machine Learning, Data Analytics, and SQL. Skilled in data analysis, predictive modeling, and visualization using Pandas, NumPy, Scikit-learn, and Matplotlib.

INTERNSHIP

AI, Machine Learning & Data Analytics Intern 2023-2024
Novitech Pvt Ltd

- Worked on Machine Learning and Data Analytics projects using Python.
- Performed data preprocessing, exploratory data analysis (EDA), and visualization.
- Assisted in model development, training, and evaluation.

AI & Robotics Intern 21/05/2025 - 06/06/2025
iHub Robotics

- Completed hands-on training in AI, Machine Learning, and Robotics.
- Worked on AI-integrated robotics applications and ML-based solutions.
- Developed technical, analytical, and problem-solving skills.

PROJECTS

Real-Time Emotion Recognition System

- Developed a real-time facial emotion recognition system using Python, OpenCV, and Deep Learning.
- Performed face detection and emotion classification from live video streams.

GitHub: GitHub Repository

Real-Time Object Detection using YOLOv8

- Developed a real-time object detection system using YOLOv8 and OpenCV for live object detection and tracking.

GitHub: GitHub Repository

Netflix Content Analytics & Visualization

- Conducted exploratory data analysis on Netflix datasets using Python, Pandas, and Matplotlib.
- Generated insights through data visualization and trend analysis.

GitHub: GitHub Repository
